

MIGUEL ORTIZ PARRA

GIS & LAND ADMINISTRATION SPECIALIST

Enterprise GIS · Cadastral Data · Digital Twin · Spatial Analysis

Madrid, Spain | +34 611 741 566 | miguel.ortizparra.geo@gmail.com | linkedin.com/in/miguelortizparra

PROFESSIONAL PROFILE

Bilingual geospatial specialist with 13+ years of experience across enterprise GIS, cadastral and property data, spatial analysis, geospatial ETL, imagery interpretation and complex urban-development environments in Spain and the UK. Strong land-administration background, including Cadastre-Land Registry coordination and property regularisation. Current work at CREA Madrid Nuevo Norte includes GIS integration within Digital Twin workflows and multidisciplinary decision support.

CORE EXPERTISE

CADASTRE & PROPERTY	ENTERPRISE GIS	DIGITAL TWIN	SPATIAL DATA
Parcel, ownership and land data	ArcGIS environments & spatial workflows	GIS integration in urban workflows	Databases, web services & ETL
INTEROPERABILITY	IMAGERY	DECISION SUPPORT	BILINGUAL
Cadastre-Registry coordination	Aerial & satellite interpretation	Technical, legal & financial teams	Spanish native · English advanced

SELECTED PROFESSIONAL EXPERIENCE

GIS Specialist | CREA Madrid Nuevo Norte | 2020 - Present

Enterprise GIS · Digital Twin · Property & land data · Urban development

- Manage and exploit large-scale geospatial, property and ownership information supporting complex urban-development and infrastructure decisions.
- Conduct spatial analysis for land management and railway-asset regularisation; supported acquisition and regularisation processes exceeding 1 million m².
- Contribute GIS data and analysis within Digital Twin workflows, connecting geospatial information with multidisciplinary decision-making.
- Coordinate geospatial workflows across technical, legal and financial stakeholders.

GIS Analyst - Graphic Databases Service | College of Property Registrars of Spain | 2016 - 2019

Cadastre · Land Registry · Enterprise GIS · Interoperability

- Implemented, migrated and maintained the GIS application used by Property Registries to support Cadastre-Land Registry coordination under Spain's Law 13/2015.
- Configured registry-management connections and cadastral web services; managed, updated and published cartographic information.
- Resolved complex GIS incidents and coordinated with registries, territorial offices, external providers, support, training and QA teams.

GIS Consultant | Geograma | 2019 - 2020

Pan-European geospatial data · ETL · Public administration

- Contributed to the GO-PEG Pan-European geospatial datasets initiative, developing use cases, geospatial analysis and ETL workflows with European partners.

13+

YEARS IN GIS

1M+ m²

LAND REGULARISATION

EU + UK

INTERNATIONAL EXPERIENCE

ADDITIONAL GIS EXPERIENCE

GIS Technician | **Cyient UK** | 2014

Rural Payments Agency · Parcel editing · Aerial/satellite imagery

- Digitised and validated agricultural parcels using aerial and satellite imagery, inspector information and rural-register change workflows.

GIS Technician | **Middlemarch Environmental Ltd** | 2012

Environmental GIS · Cartography · Aerial imagery

- Produced thematic cartography and environmental GIS analysis using ArcGIS and aerial imagery for ecological, landscape and planning projects.

TECHNICAL TOOLKIT

GIS PLATFORMS

ArcGIS Pro · ArcGIS Enterprise · ArcGIS Portal · QGIS

AUTOMATION

Python / ArcPy - practical and developing

SPATIAL DATA

SQL · PostgreSQL/PostGIS · spatial databases · web services

DOMAIN

Cadastral · land registry · urban development · property data

DATA WORKFLOWS

Geospatial ETL · data integration · cartography · QA

ANALYSIS

Spatial analysis · imagery interpretation · decision support

ACADEMIC FOUNDATION & RESEARCH

PhD Candidate · Geomatics Engineering

Universitat Politècnica de València
Research: Cadastral-Land Registry coordination in Ibero-America

Postgraduate · GIS Development & Management

University of Cantabria · With distinction

Master's · International Cooperation & Development

University of Cantabria

Geography

University of Cantabria · Erasmus, University of Genoa

LANGUAGES & ADDITIONAL CREDENTIALS

Spanish - Native **English** - Advanced **Italian** - Advanced

Security clearances: NATO · EU

VALUE PROPOSITION

GIS + land administration + urban data + Digital Twin. A profile built around the full lifecycle of geospatial information: capturing and validating spatial data, integrating cadastral and registry information, maintaining enterprise GIS environments, and translating geospatial evidence into operational decisions.
